## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 3, 6, and 9 are allowed. The following is an examiner's statement of reasons for allowance: The references of record, either singularly or in combination, do not teach or suggest at least a semiconductor device comprising: wherein said gate electrode is formed of a plurality of stacked layers including a first electrode film and a second electrode film formed on an outer circumferential side of said first electrode film; and wherein said first electrode film has an end thereof spaced from said wiring layer, and said second electrode film is formed so as to electrically connect with said wiring layer.

Regarding claim 6, the references of record, either singularly or in combination, do not teach or suggest at least a semiconductor device comprising: wherein said gate electrode film includes a first electrode film formed as to enclose said gate pillar from a circumferential direction thereof, and a second electrode film formed so as to enclose said first electrode film from a peripheral side thereof, and wherein said first electrode film is formed with grain size smaller than that of said second electrode film.

Regarding claim 9, the references of record, either singularly or in combination, do not teach or suggest at least a semiconductor device comprising: wherein said gate electrode film includes a first electrode film formed as to enclose said gate pillar from a circumferential direction thereof, and a second electrode film formed so as to enclose said first electrode film from a peripheral side thereof, and wherein said channel region is formed with a grain size greater than that of said first electrode film or said second electrode film.
